

FIT ALPHA SMID

KEY HIGHLIGHTS

- **Eliminate emotional bias.** The portfolio sells stocks using 100% technical analysis. If the stock is "broken", it will be eliminated
- For taxable accounts the portfolio can **employ tax strategies** to help minimize a clients tax burden
- Over time, **medium and small companies** have shown greater returns with higher volatility
- The portfolio is **investment style agnostic** investing in both growth and value stocks. It can overweight either style depending on the most recent analysis

STRATEGY DESCRIPTION

The portfolio invests in stocks of medium and small companies (under \$20 billion market cap) that are listed on U.S. domestic stock exchanges. Our process uses a proprietary scoring system incorporating both fundamental and technical analysis to add stocks to the portfolio. When eliminating, or selling, stocks from the portfolio, the team uses 100% technical analysis.
